

The GM Oil Life Monitor System and Maintenance I and Maintenance II

Maintenance I and II Schedules

1. Maintenance I Service Package

- Perform when Change Engine Oil light comes on or within 10 months since vehicle was purchased
- Perform when Maintenance II was last schedule used

During Maintenance I the following services are performed:

- Change the engine oil and filter
- Reset oil life system
- Inspect engine air cleaner filter – replace as needed
- Rotate tires and check inflation pressures and wear
- Inspect brake system
- Check engine coolant and windshield washer fluid levels – add fluid as needed
- Perform any needed additional services

2. Maintenance II Service Package

- Perform when Maintenance I was last schedule used

Maintenance II includes everything in the Maintenance I package plus the following additional items:

- Inspect suspension and steering components
- Inspect the engine cooling system
- Inspect the wiper blades
- Inspect restraint system components
- Lubricate body components
- Inspect the throttle system
